

Dear Parents/Carers

We are excited to announce that **Number Day will take place on Friday 6th February**, and we are proud to be joining in with this fun, nationwide celebration of maths! This is not a fund raising event but a valuable, fun and creative opportunity to celebrate our high quality teaching and learning in Maths across the school.

Throughout the day, children across the school will be fully immersed in a wide range of **hands-on, engaging mathematical activities** linked to number, pattern and problem-solving. These activities are designed to help children see maths as something fun, creative and enjoyable, while also encouraging confidence and enthusiasm in the subject.

For our **Key Stage 2 children**, there will also be a **nationwide Times Tables Rock Stars (TTRockstars) competition** taking place on the day. Children will be representing our school and competing against others across the country. We are hoping to make the leaderboard once again, so lots of times-tables practice beforehand will be encouraged!

To add to the excitement, **all children are invited to come in non-uniform (number theme) for the day**. In previous years, we have seen some wonderfully creative ideas, including:

- EYFS – Ten Town character dress up
- T-shirts or tops with numbers printed on them
- Clothes with spots, stripes or patterns that can be counted
- Spotty or stripy socks
- Dressing up as a calculator or dice
- Dressing as a famous mathematician
- Any other creative number-themed outfit

Anything goes, and we encourage children to be as imaginative as they like.

We are really looking forward to celebrating Number Day together and thank you, as always, for your support. It promises to be a fun, action-packed day full of numbers, learning and laughter!

Mrs Taylor

Maths Leader
